EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in telephone interviews with Attorney Pavan Agarwal, Registration No. 40,888, on September 2 and on September 10, 2004.

The application has been amended as follows:

In the claims:

Cancel claims 1, 2, 4 through 6, and 8.

Claim 9, line 1: Delete "as claimed in Claim 8" and replace with --of an integral heat-exchanger, comprising: at least two first heat exchanger tubes which extend in parallel with each other; at least two second heat exchanger tubes which extend in parallel with each other, wherein the two second heat exchanger tubes are juxtaposed with the first heat exchanger tubes; and a corrugated fin including a corrugated first part interposed between said first heat exchanger tubes, a corrugated second part interposed between said second heat exchanger tubes, and a flat connection part arranged between the corrugated first and second parts, wherein said corrugated first part of the fin is formed with a plurality of first louvers each extending substantially between the two first heat exchanger tubes, wherein said corrugated second part of the fin is formed with a plurality of second louvers each extending substantially between the two second

heat exchanger tubes, wherein an innermost one of said second louvers is positioned away from an innermost end of said corrugated second part of the fin by a given length, wherein said flat connection part is formed with a third louver in the vicinity of an innermost one of said first louvers, wherein said third louver is constructed to obstruct a heat transfer in the fin, wherein said third louver is positioned substantially across the width of the flat connection part, and wherein the length between said third louver and said innermost one of said second louvers is substantially equal to the length of said flat connection part of said fin--.

Cancel claim 11.

Reinstate claim 13.

Also, in claim 13, lines 17-18: Delete "wherein each said radiation portion is constructed not to deteriorate the heat transfer in the fin substantially" and replace with -- wherein each of said plurality of heat radiation portions is constructed to avoid deterioration of the heat transfer in the fin substantially--.

Reinstate each of claim 29 through 38.

In claim 29, line 1: Delete "in Claim 28" and replace with --in Claim 13--.

In claim 33, line 1, delete "as claimed in Claim 1" and replace with --of an integral heat-exchanger, comprising: at least two first heat exchanger tubes which extend in parallel with each other; at least two second heat exchanger tubes which extend in parallel with each other, wherein the two second heat exchanger tubes are juxtaposed with the first heat exchanger tubes; and a corrugated fin including a corrugated first part interposed between said first heat exchanger tubes, a corrugated second part interposed between said second heat exchanger tubes, and a flat connection part arranged between the corrugated first and second parts, wherein said corrugated

first part of the fin is formed with a plurality of first louvers each extending substantially between the two first heat exchanger tubes, wherein said corrugated second part of the fin is formed with a plurality of second louvers each extending substantially between the two second heat exchanger tubes, wherein an innermost one of said second louvers is positioned away from an innermost end of said corrugated second part of the fin by a given length, wherein said flat connection part is formed with a third louver positioned closer to an innermost one of said first louvers than to the innermost one of said second louvers, wherein said third louver is constructed to obstruct a heat transfer in the fin, and wherein said third louver is positioned substantially across the width of said flat connection part--.

Also, in claim 33, lines 6-7: Delete "wherein each said radiation portion is constructed not to deteriorate the heat transfer in the fin substantially" and replace with -- wherein each of said plurality of heat radiation portions is constructed to avoid deterioration of the heat transfer in the fin substantially--.

2. EP 825404 A2, published on February 25, 1998, has the same disclosure as U.S. Patent No. 6,095,239 (previously of record), issued to Makino et al. on August 1, 2000.
